

## Companies that Employ Post-Doctoral Students in Research

April 30-May 6, 2020 | n=22

Does your company maintain a program, in collaboration with a university, in which post doctoral researchers are employed by your organization?

### Further Insight

The article, [“A Different Kind of Postdoc Experience”](#) highlights the advantages of this type of program. It references the National Academies of Science publication, [The Postdoctoral Experience Revisited](#).

### Select Survey Comments:

- We employ a substantial number of Ph.D. holders in our business, but not in direct collaboration with universities in most cases—there are a few exceptions.
- Not formal, but we do this on a case-by-case basis.
- Fund post-docs or hire post-docs directly. But no U-I coordinated program to recruit.
- We do employ them, but not in collaboration with a particular university. It's usually part of our Ph.D. fellowship program, as well as recruiting at universities with specialized skills.
- We do such programs on a university-by-university basis. We set up programs where the post-docs are funded by us but employed by the university. So we rarely employ post-docs directly. But we fund a huge number under specific institutional agreement.
- No program, but we go through a job post for each post-doc opportunity that any graduating Ph.D. can apply to.
