

Siemens Empower+ Cooperates with Education (SCE)

Program Offering for Higher Education Partners
With Expanded opportunities for customizable
programming and workforce development

A close-up photograph of two hands, one from an adult and one from a child, holding a glowing, golden ring. The background is a soft, hazy sunset over a landscape, with the sun low on the horizon, creating a warm, golden light. The hands are positioned as if they are about to place the ring on a finger, symbolizing vision, hope, and future generations.

What is your vision?

Siemens Empower+ “Siemens Cooperates with Education (SCE)”

- is an academic and workforce development outreach program designed for new and existing customers.

At Siemens, we share our resources and expertise on projects impacting

- sustainability,
- STEM / STEAM / HSTEM,
- workforce development,
- energy efficiency,
- In-reach and Outreach,
- and Community Relations.

Siemens four strategic priorities are reflected ...

Customer impact

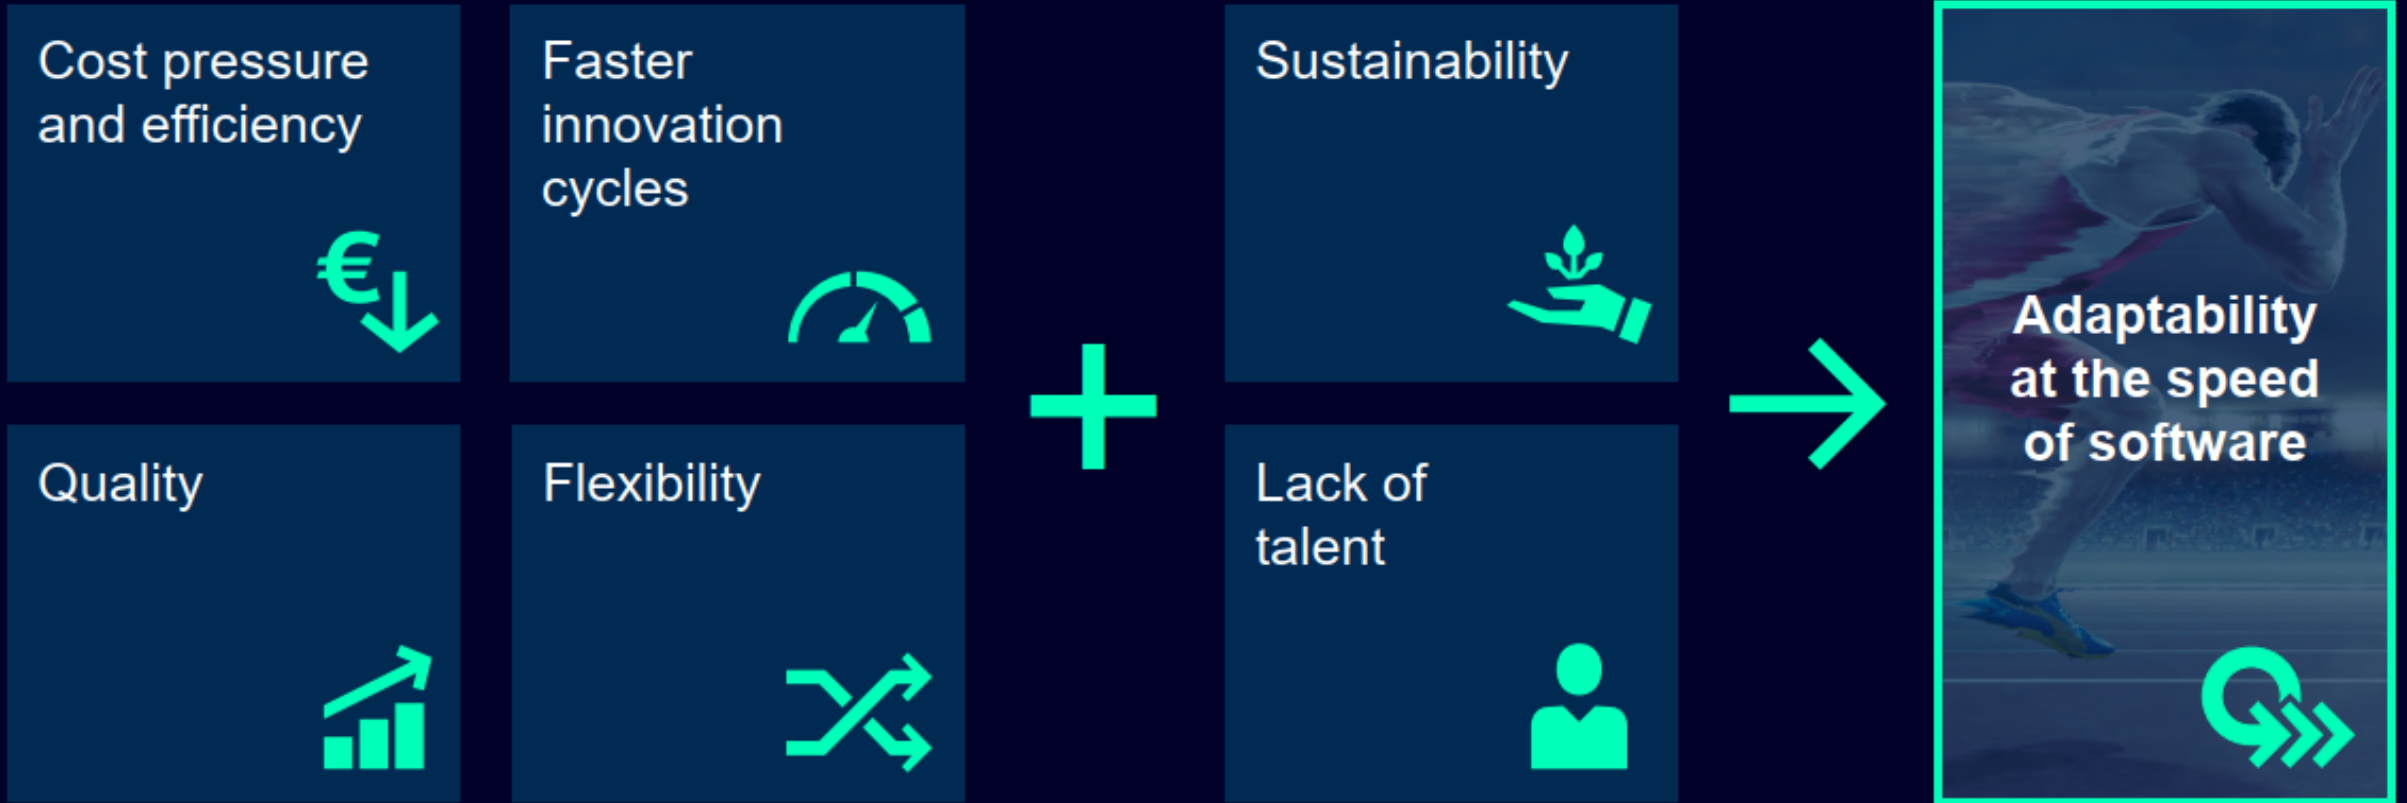

Empowered people

Building Products

Electrical Products

Siemens SI (Smart Infrastructures)

As Smart Infrastructure, we can deliver full solutions to our customer base

- Building automation
- Fire safety and security
- Low- and medium-voltage power distribution products, solutions, and services
- Protection automation and control
- Energy storage
- Electric-vehicle charging
- Control products
- Microgrid controllers
- Renewable integration and renewable solutions

Our Business Units

Siemens DI (Digital Industries)

Siemens Digital Industries Software is driving the digital transformation

About DI SW

#1 Industrial Software market share

€3.4bn revenue globally

22,000 employees across 36 countries in 250 sites

~220,000 developers building applications on DI SW technology

Comprehensive Digital Twin

Personalized Adaptable/ Modern

Flexible Open Ecosystem

Siemens “T” (Technologies)

Siemens’ commitment to sustainability
Our **DEGREE** framework sets clear priorities

Employability
Enable our people to stay resilient and relevant in a constantly changing environment

Equity
Foster diversity, inclusion, and community development to create a sense of belonging

Resource efficiency
Achieve circularity and dematerialization

Decarbonization
Support the 1.5°C target in the fight against global warming

Ethics
Foster a culture of trust, adhere to ethical standards and handle data with care

Governance
Apply state-of-the-art systems for effective and responsible business conduct

SIEMENS

Siemens Empower+ Cooperates with Education (SCE) – Higher Education Partnership Programs - Supporting your Core Mission!

EMPOWER Learning

- Packaged STEM programs
- Resources for educators
- Hands-on learning
- Career exploration

EMPOWER Custom

- Empower (seed) grants
- Project expertise / consultation
- Student engagement
- Community outreach
- Living Labs

EMPOWER Community

- Storytelling via 360° communications
- Impact videos
- Equity, Diversity & Inclusion
- Community outreach
- Industry engagement

EMPOWER Workforce

- **Academic Programming**
- Digital Industries Software (DiSW)
- Siemens Mechatronics Systems Certification Program (SMSCP, Sitrain)
- Siemens Cooperates with Education (SCE)
- BAS Technician Certification
- Microgrid Training Program
- e-Mobility Training Program
- SISchool
- T UR (formerly CT; intermittent)
- **Talent Acquisition**
- Internships and recruiting
- Development and hiring programs

CHiPS and Science Act - Siemens Comprehensive Industry Partnership Program.

- Provide End 2 End Technology inclusive of Product and Process solutions
- Expand Domain Skills via Outreach and Training solutions (Inclusive of Software tools, thought leadership and Recruitment Alignment) based on Industry Needs and Strategies

Siemens Response:

An end-to-end turnkey education program that works for both universities and businesses that span the End-to-End Semiconductor “Lifecycle” from Design to Manufacturing to Delivery focused on :

- Digital Transformation and Simulation
- Chip Development
- Infrastructure
- Automation

Enabling Digital Transformation through Digital Threads

Integrated Lifecycle Management

Electronic Systems Design

Simulation Driven Design

NPI and Supplier Collaboration

Smart Manufacturing

Workforce Skills Enablement and

Enabling the Semiconductor Development Thread "Ecosystem"

Design For "x" (Quality, Assy, Mfg..)

Chip Development

Infrastructure

Automation

VISION

To be a valued partner and help enable success in your communities.

MISSION

To help you achieve more while strengthening your communities through these programs.

**You have ambitions, we help make them happen with EMPOWER+!
We help bring life to programs that lack support or expertise,
creating a better future for you and your community.**

Gerald (Gerry) Deren
734 673 2962
gerald.deren@siemens.com

Mr. Deren has spent the past 41 years primarily focused on helping companies and customer in the mature and emerging markets find ways to improve their product and/or process development methods. His work has resulted in finding ways to improve their efficiency, reduce development costs or in helping them to develop a competitive advantage. As a process SME, he helps them focus on improving quality, reducing cycle time or purely improving efficiency and execution through the use of enabling technology, process optimization and skill enhancement. He represents the voice of the customer and coach's and counsel's improvement into solution development.

Gerry leads a team of Academic Enablement professionals across the Americas for Siemens Digital Industries Software (DISW) focused on helping academia become "relevant" for manufacturers as they face the challenges of sustainment within their innovation, validation and manufacturing lifecycles.

Mr. Deren represents Siemens on many Advisory Boards focused on establishing / building the, OEM to SMB to Academia (K-12 through Higher Ed) ecosystem consisting of engineering and digital manufacturing program domains including curriculum adaptation, research and joint projects. He is a well-known speaker on Industry 4.0, and other model-based topics related to business process improvement, global supply chain collaboration and product lifecycle management.

Thank you.

Gerry Deren
